

The Sustainability and Environmental Policy Statement of **LUNIA 3D**

Established in 2020 and based in Cowbridge South Wales, **Lunia 3D** work with businesses and individuals, throughout the UK, to create new product design solutions based on innovative ideas.

Lunia 3D transform concepts into effective products and services. Our experienced designers are dedicated to transforming your abstract ideas into 3D models and 3D printed objects. No job is too big or too small. We work with individuals and businesses of any size and always happy to take on new projects.

Our services include: 3D Printing, 3D Design and Prototyping.

We are a responsible organisation that is committed to protecting the environment, ensuring compliance with all environmental legislation and continually minimising our environmental impact as much as is reasonably practicable.

We consider our environmental impacts to be minimal but these include carbon emissions from the use of transport and consumption of energy, packaging materials and waste materials.

We are members of the **Eco Responsible 3D Printing Alliance** – committed to sustainable 3D printing and Climate positive initiatives.

To minimise our impacts we:

- ✓ Minimise travelling, encouraging video conferencing and teams meeting
- ✓ Reuse packaging materials and 100% recyclable cardboard and packing materials wherever possible.
- ✓ Recycle plastic materials for reuse adopting a circular economy approach
- ✓ Reduce energy consumption with LED lighting, energy efficient equipment and a strict “switch-off” policy for lighting and equipment when not in use.

We are committed to the following:

- The protection of the environment.
- Compliance with environmental legislation and approved codes of practice that are relevant to **Lunia 3D**
- Setting targets for continual improvements of our environmental performance.
- Actively promoting the waste hierarchy treatment of *reduce, reuse and recycling* and to ensure the safe disposal of waste where reuse or recycling is not viable.
- Continual monitoring and reviewing of our environmental impacts.
- Raising awareness of environmental issues with all employees of **Lunia 3D**
- Communicating the environmental aims and objectives to all staff and stakeholders.
